

The Banque Agricole du Niger connects its banking network to Sonema

Monaco, 16 February 2017

As part of its national development programme, the Banque Agricole du Niger (BAGRI) has entrusted Sonema with the installation of a telecommunications network.

With the help of local partner Gamma Informatique, Sonema has deployed a satellite solution in each of the Nigerien group's 7 agencies. The deployment covers the following towns: Agadez, Diffa, Konni, Maradi, Tessaoua, Zinder and Doutchi. The entire network has also been interconnected to the BAGRI headquarters in Niamey.

The implementation of this service will allow the employees of BAGRI to exchange data and have access to banking applications via a highly-secure network. The Nigerien bank will also have access to Skyview, an application created by Sonema which allows real-time network supervision.

Sonema's partner in Niger since 2002 Gamma Informatique, will carry out the installation and on-site maintenance for the equipment.

Catherine Delom, Sonema's Managing Director said: *"We are delighted to work with a new customer in Niger, a country where Sonema already has a strong presence and is recognised for our quality of service and expertise in deploying multiple sites. Being able to rely on an experienced local partner is one of our great strengths, which our contacts at the Banque Agricole du Niger found very reassuring."*
