

The ES-KO group has placed its trust in Sonema once again in 2017

Monaco 8th March 2017

As part of its activity on the African continent, Monegasque group ES-KO has renewed its partnership with SONEMA for the development and operation of its telecommunications network.

Since 2012, SONEMA has supported the Monegasque group ES-Ko's development in the Democratic Republic of Congo and in South Soudan. SONEMA supplies several VSAT stations in both countries which allow the ES-KO staff to communicate with each other in isolated African regions.

Thanks to the VSAT equipment, the ES-KO staff in Africa can easily access applications which are essential not only for internal management in connection with the ES-KO group, but also for warehouse administration, product tracking, internal messaging and data sharing. These services allow ES-KO's operational and management teams to access a more advanced telecommunications system, for both "live" discussions and rapid decision making.

Thanks to their close partnership, ES-KO and SONEMA by uniting their skills and their respective specialities, can offer robust and competitive global solutions for international tender proposals.

Furthermore ES-KO and SONEMA are two of the founding members of CEMA, the "Club of Monegasque Entrepreneurs in Africa".

The common values and corporate culture shared by ES-KO and SONEMA unite them in a strong and lasting partnership.

Franco Zanotti, President of the ES-KO group: *«SONEMA is a prestigious company with whom we are proud and happy to associate; our respective groups are two strong units we can rely on in challenging times».*

Bernard Delorme, SONEMA President: *«We are honoured by ES-KO's renewed trust. Quality of service and anticipating our customer's needs are our daily motivation here at SONEMA».*

ABOUT SONEMA

In a digital environment that is rapidly evolving, data management and processing remain an integral part of a company's competitiveness and distinctiveness. It is essential to have a strategy in place to secure and protect data traffic.

By operating and managing scalable, bespoke telecommunications solutions, Sonema accompanies its customers with their projects on a daily basis. Bearing in mind commitment, and with a strong understanding of what is at stake, we aim to be a proactive partner to our customers by allowing them to focus on their core business.

Remaining faithful to our values of respect, transparency and responsibility, we place trust at the heart of our customer relationships.

Sonema is also:

- 65 members of staff committed to our customers, every day
- 650 customer installations across 50 countries in Africa
- 50 certified local partners all over the African continent
- Sonema is a founding member of the CEMA (Club of Monegasque Entrepreneurs in Africa)
