

Improve your network performance !

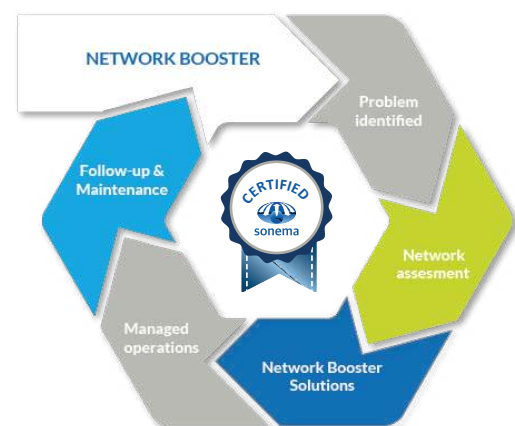

Guaranteed optimal network performance in all conditions through optimisation, monitoring and load balancing of your circuits.

SATURATION, LATENCY PROBLEMS AND NETWORK FAILURES: KEY ISSUES

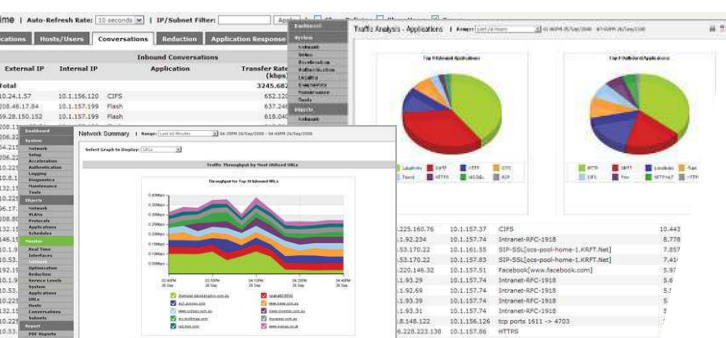

- Growing number of new business applications
- Unsuitable network dimensions
- Company centralisation and server consolidation on multiple sites
- Cost optimisation issues
- Network complexity: Cloud, Virtualisation, Hybrid networks

NETWORK BOOSTER: AN ONGOING NETWORK OPTIMISATION PROCESS

Activated by regular monitoring and service degradation, Network Booster provides :

- Environmental assessment and observation
- Performance measurements
- Reports and recommendations

COMPLIMENTARY MODULES

CONTROL BOOSTER

Network viewing, granular identification and monitoring of users by application.

PROBLEMS	FEATURES
Lack of transparency in network activities	Detection and monitoring of traffic by port, application and protocol...
Unregulated traffic	Management of CoS/QoS rules
Poor application performance	Prioritisation of traffic by application and/or user

OPTIM BOOSTER

Accelerated data transfer and applications for hybrid WAN networks.

PROBLEMS	FEATURES
Congestion	Deduplication, compression, caching: ↘ volume of data
Protocol latency	Protocol acceleration
Application latency	Application acceleration

LOAD BALANCING

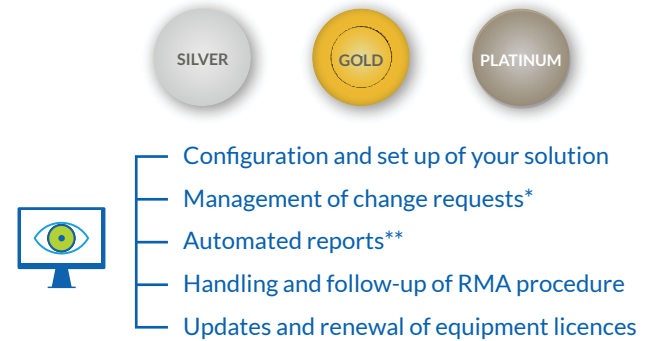

Guaranteed high-availability networks using hybrid connectivity.

PROBLEMS	FEATURES
Service cuts	Backup
Slow network and application performance	Application load balancing
Blockages	Link aggregation

MANAGED OPERATIONS

Our experts guarantee optimum module functionality.

3 levels of managed operations are available :

*Subject to the validity of the maintenance contract
** Equipment permitting

ADVANTAGES

- Efficient bandwidth management for your circuits (QoS)
- Reduces the costs associated with your technology resources
- Improves reliability and resiliency
- A better user experience
- Allows you to concentrate on your core business

QUALITY OF SERVICE

- A tailor-made service fully managed by our team of experts dedicated to LAN/WAN analysis
- 24/7 monitoring in real-time with equipment alarm and data collection
- Monitoring, supervision and maintenance of the Network Booster solution

SONEMA ALWAYS WITH YOU

A team of experts at your service

INSTALLATION

TRAINING

SUPPORT & ASSISTANCE

About Sonema

A proactive partner, we develop tailor-made and scalable telecom solutions to assist our clients with their projects on a daily basis. Our sense of commitment is based on a strong understanding of their issues, and allows them to concentrate on their core business and latest innovations.
