

An optimal solution for maximum flexibility!

A cloud computing service which uses virtual machines (VM) to provide the very highest levels of security

FLEXIBILITY, OPTIMISATION, AVAILABILITY: KEY ISSUES

- Quickly deploy and adapt VM to match workload requirements
- Improve cost management
- Streamline IT infrastructures
- Anticipate increasing storage requirements
- Carry out operational maintenance for services and applications

VIRTUAL SERVICES: USING THE IaaS MODEL

Secure and scalable service

- Business Continuity Plan for infrastructures
- Tier III design Datacentre PCI DSS compliant
- Next Generation Firewalls included
- Experts in connectivity, security and hosting

Cost Efficiency

- PAYG Model (Pay As You Grow)
- All-inclusive offer with no hidden costs
- Optimisation of investments (CAPEX) and operating costs (OPEX)

Peace of mind and flexibility

- Scale your VM to meet requirements
- Fully-managed back-up and VM replication
- Three service levels

PROPRIETARY DATACENTER - TIER III DESIGN

ELECTRICAL SECURITY

- Dual power source
- Power generator with automatic transfer switch
- N+3 redundant air con system

NETWORK SECURITY

- Physical LAN redundancy
- Geographic redundancy of fibre optic WAN interconnections
- Next Generation Firewalls
- 24/7 Supervision

PHYSICAL SAFETY

- Access-control system
- Anti-intrusion system

FIRE SAFETY

- The technical centre premises are equipped with a category A fire safety system
- Data centre equipped with a gas extinguishing system (trifluoro methane (FE-13))

SERVICE FEATURES

The VM solution enables you to outsource your applications to virtual servers in our datacentre whilst ensuring the management and administrations.

3 SERVICE LEVELS	SILVER	GOLD	PLATINUM
Scalable sizing	✓	✓	✓
VM Replication ⁽¹⁾	✗	Choice of feature	✓
VM Backup ⁽²⁾	✗		✓

1. Continued VM operation with no service interruptions in the event of an infrastructure failure

2. Recover data in the event of a failure of the operational VM

OFFER SUMMARY

- Time commitment: 12/24/36 months
- NGFW: Includes IDS/IPS, anti-spam, anti-virus and URL filters
- Requirement qualification with a SONEMA expert.
- Support: Level 1 SONEMA support included; activity monitoring via the Skyview platform

FUNCTIONS

- ✓ Virtual servers scaled to customer requirements: vRAM, vCPU, vDISK
- ✓ Multiple environments supported: Windows® / Linux®
- ✓ vSphere ESXi hypervisor fromVMWARE
- ✓ EMC and DataCore storage

EXEMPLES D'APPLICATIFS SUPPORTÉS

- Messaging and unified communications, collaboration tools
- E-Banking, CRM and ERP systems
- Web Hosting
- Test Platforms

BENEFITS FOR OUR CUSTOMERS

ALL-INCLUSIVE OFFER :

No hidden costs, no thin provisioning, no IOPS performance counter (input/output operations per second)

SECURE ENVIRONMENT :

Proprietary datacentre with Tier III PCI DSS compliant design at the heart of the customer's network connectivity

PARTNERSHIP MODE SOLUTION:

Customer assistance and advice for all telecom projects

DEDICATED SPECIALIST ADVISOR

SONEMA ALWAYS WITH YOU

A team of experts at your service

INSTALLATION

TRAINING

SUPPORT & ASSISTANCE

About SONEMA

A proactive partner, we develop tailor-made and scalable telecom solutions to assist our clients with their projects on a daily basis. Our sense of commitment is based on a strong understanding of their issues, and allows them to concentrate on their core business and latest innovations.
