

Boost your application performance!

A fully managed service for the active and optimised management of your hybrid networks.

YOUR WAN ISSUES

Network complexity

- Efficiently managing a WAN infrastructure which is increasingly complex
- Enabling consistent and reliable application performance while dealing with inconsistent network connections

The impact of cloudification on WAN

- Effectively support the migration of applications to the Cloud
- Overcome performance and security issues with Internet connections

Meet WAN requirements promptly

- Quickly deploy new configuration rules on the entire network
- Handle one-time capacity requests easily

BENEFITS OF SONEMA'S MANAGED SD-WAN

An enhanced user experience

- Optimised routing
- Application-specific SLAs
- Reduced service outages

Improved security

- Full protection against external threats (NGFW)
- Secure Internet and Cloud access
- Traffic encryption

Increased agility

- Centralised controller which enables global network overview plus improved troubleshooting
- Real-time follow-up of traffic and application performance
- Automated deployment of rules and sites (ZTP)

SERVICE FEATURES

Benefits

- Network analysis, recommendations and architecture
- Provision of equipment (rental mode if possible)
- Shipping and installation of solutions on remote sites
- Setup and configuration

Continuous services

- Management of SD-WAN services
- Management of customer configuration requests
- Monthly reports
- 24/7 Alarm monitoring and collection
- Management of incident tickets
- Handing and follow up of RMA procedures
- Equipment version renewal

Sonema's value-added benefits

- Support via a single dedicated point of contact
- Strict SLAs with associated penalties
- The freedom to use a service using a connection provided by Sonema or another operator

FUNCTIONALITIES

✓ INTELLIGENT ROUTING

- Automatic load balancing
- Routing by SLA strategy for applications
- Cloud intelligence : Selection of the most efficient and powerful path for SaaS (ex: Office 365)

✓ NEXT GENERATION FIREWALL SECURITY (NGFW)

- Anti-virus, Anti-spam, prevention and detection of threats (IDS/IPS)
- Full application transparency
- Efficient authentication processes

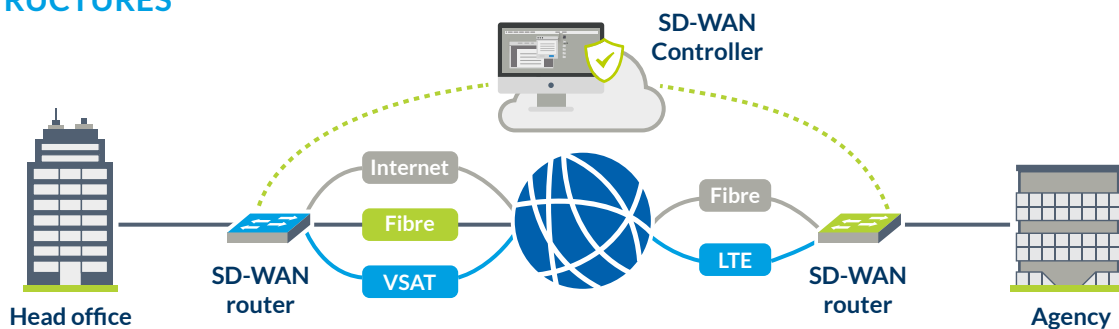

✓ ADVANCED OPTIMISATION

- Caching, Compression and Acceleration
- Latency optimisation
- FEC-based packet loss reduction

✓ ENHANCED VISIBILITY

- Management console for network topology
- Enhanced troubleshooting
- Full transparency regarding connection status

INFRASTRUCTURES

BENEFITS OF AN ENTIRELY-MANAGED SERVICE

- Network expert with proven experience in deploying complex hybrid networks
- One-Stop-Shop for the installation, deployment and management of your network
- Proactive integrator to support and provide you with tailor-made solutions

SONEMA ALWAYS WITH YOU

A team of experts at your service
