

Enhance your security with advanced privileged account management!

Real-time privileged access management and control to guarantee integrity of your data

PRIVILEGED ACCESS CONTROL CHALLENGES

- Assign privileges to users or groups of users for their target resources only
- Monitor all privileged access to critical systems
- Secure login credentials and passwords
- Fight against cyber-attacks efficiently
- Comply with the RGPD, PCI-DSS, ISO 27001 regulations

A PRIVILEGED ACCESS MANAGEMENT SOLUTION TO SAFEGUARD YOUR IT SYSTEM

Privileged access Management

- Automatic authorisation, authentication and revocation rules
- Streamlined approval procedure for access to critical resources

Security and Protection

- Encryption and storage of passwords in a password-protected vault
- Enhanced remote authentication procedure
- Forced rotation of passwords and SSH keys

Traceability and Compliance

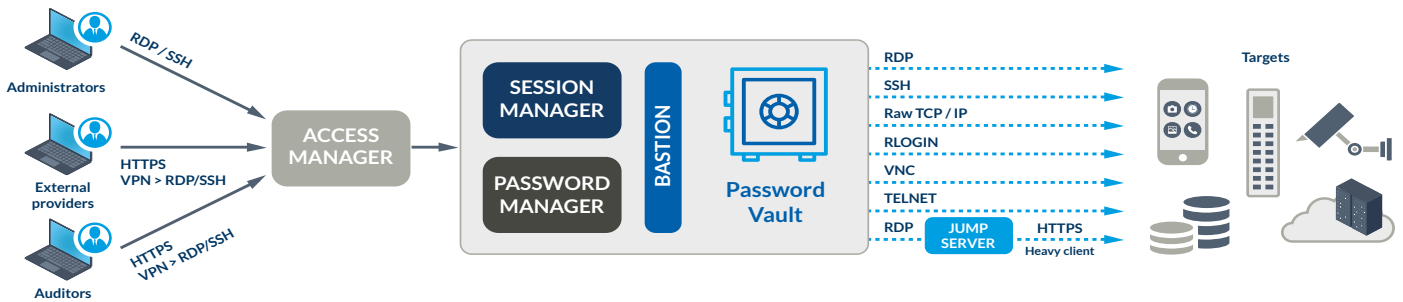

- Real-time monitoring of privileged users and connections (4-eyes mode)
- Video recording and replay of sessions
- Dashboards and context-sensitive reports

* Privileged Access Management
